DETAILED ACTION

Allowable Subject Matter

Claims 1-4, and 6-21 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art either alone or in combination doesn't teach the limitation of:

storing a dynamic motion model composed of a set of differential equations, each differential equation describing a particular dynamic gesture to be recognized of the form: $x = f(x, \theta)$ where x is vector describing position and velocity components, and θ is a tunable parameter; capturing the motion to be recognized along with the tunable parameters associated with a gesture-making target; extracting the position and velocity components of the captured motion; and identifying the dynamic gesture by determining which differential equation is solved using the extracted components and the tunable parameters in combination with the other claimed features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
